OEM EXHAUST UPGRADE ESSENTIALS EXTENDED LIFECYCLE FOR LESS DOWNTIME

We build exhaust solutions that add value for our customers. Downtime is costly, and that's why we consider an exhaust system an investment in your productivity. Aletek OEM replacement exhausts are designed for extended product lifecycle and interchangeability with OEM parts.

BUILT TO PROTECT

SYSTEMS
EXHAUSTS

WHAT IS AN OEM REPLACEMENT EXHAUST?

- Exhausts must suit a specific asset type and model
- Replicate the OEM exhaust path without modifications
- Compatible with OEM engines and bolt onto turbo outlets

THE KEY METRIC IS PRODUCTIVITY

The common goal in mining is productivity, fleet performance, and maintenance. Premature exhaust component or system failure results in unplanned downtime and increased TCO (*Total Cost of Ownership).

Aletek's OEM replacement exhaust range can help boost fleet productivity with:

- **Reliability** – less downtime and maintenance costs
- **Supply dependability** – key asset parts in stock
- **Durability** – extended lifecycle (see our 793F case study)
- **ROI** – strategic upgrade, ~30% TCO* cost savings

OEM REPLACEMENT EXHAUSTS GIVES YOU OPTIONS

OEM replacement exhausts offer you conveniences like the choice of suppliers, competitive pricing, and a contingency in the case of an OEM stock shortage. Most importantly, Aletek makes improvements for reliability, such as:

- Solid machined flanges to prevent cracking on engine pipe ends
- Vent ports on dual-wall pipes help prevent failure of inner pipe wall
- Parts improvements such as bellow upgrades and brackets

BUY THE BEST IN KIND, FOR PEACE OF MIND

When it comes to improving productivity for your fleet, investing in equipment and accessories that are best in class is a must. We believe an Aletek OEM replacement exhaust package is an investment in your productivity.

- **Choice** – an alternative to OEM with improvements
- **Savings** – reduced total ownership costs
- **Compatibility** – interchangeable with OEM parts
- **Guarantee** – 100% compatible with OEM exhaust systems
- **Durability** – endurance in harsh environments
- **Quality** – Australian designed and manufactured
- **Convenience** – in-house engineering and manufacturing for hassle-free installs
