WALL-FLOW DPF UPGRADES – FOR A SAFER UNDERGROUND

Diesel emissions underground are harmful. Wall-flow DPFs from Aletek feature high performance, premium filters to trap Diesel Particulate Matter (DPM) effectively.

- Premium American filters with a regenerative catalyst coating
- High flow filter designs prevent low power and backpressure issues
- Extended service life and reduced cleaning costs
- Rotatable frame options for protection in transit

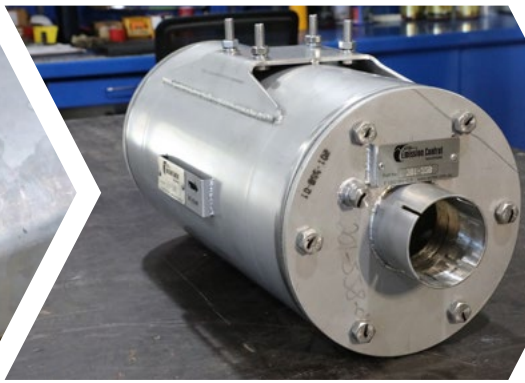

Aletek DPF upgrades improve air quality, exhaust performance and efficiency. We offer onsite services, testing, install guides and more.

REDUCED TOTAL COST OF OWNERSHIP

Extended service life can reduce TCO*
by 30-40% *Total Cost of Ownership

>99% DPM EMISSION REDUCTIONS

Heavy-duty stainless steel construction,
Australian-made

BACKPRESSURE MONITORING

Track backpressure to proactively plan cleaning to
optimise DPF lifecycle and machine performance
