SOUND SUPPRESSION EXHAUSTS & ATTENUATION

MEET SOUND COMPLIANCE TARGETS. IMPROVED SERVICING AND MAINTENANCE ACCESS. END-TO-END SERVICE AND SUPPORT.

IMPROVED SERVICING AND MAINTENANCE ACCESS

A focus on ease of maintenance minimises machine downtime and eliminates maintenance frustration.

- Alleviate restrictions caused by the traditional 'box it up' approach
- Improved access to engine bay and valve sets
- Heat exposure to other components is reduced

Dual-wall technology eliminates the need for thermal blankets on exhaust pipes.

- With no blankets needed on these components, this eliminates maintenance cost, downtime and potential for incorrect fitment
- Reduce surface temperatures to mitigate risk of fire
- Resistant to oil and fuel infiltration

Engineered and manufactured in Australia. Local onsite service and support capability for all regions.

Solutions for Cat trucks, tow hauls, water carts and dozers (non XQ and XQ)

Innovative T282 2-stage exhaust delivers significant noise reductions and accessibility
